Fax: (614) 788.4412

OhioHealth is pleased to offer an outpatient wheelchair seating clinic. The goal of our program is to provide a customized evaluation for each patient determining the most appropriate mobility device based on their medical needs. This multidisciplinary clinic occurs twice each month.

Our team includes:

- + Physician specializing in physical medicine who evaluates your patient's needs and finalizes recommendations
- + Physical or occupational therapist that evaluates and assesses your patient's specific mobility needs
- + Supplier who represents the medical supply company that will submit the necessary paperwork to your patient's insurance company and supply the medical equipment

Patients who may be candidates for the wheelchair seating clinic include:

- + Adults who need a wheelchair to be independent within their home
- + Adults with posture and positioning issues that need to be addressed when getting a new wheelchair
- + Adults whose current wheelchair or seating system does not adequately address these issues

How to make a referral

A physician referral is required, including the following:

- + Consultation Request: "Physical Medicine Consult and Fit for Wheelchair"
- + Patient diagnosis and diagnosis codes
- + Most recent office notes regarding medical condition
- + Any diagnostic testing that supports medical diagnosis and degree of impairment
- + Any specialist consultation reports such as cardiology, neurology, or pulmonary medicine
